U.S.S.R. COMPUTATIONAL MATHEMATICS AND MATHEMATICAL PHYSICS

VOLUME 13, 1973

PERGAMON PRESS
OXFORD : NEW YORK : BRAUNSCHWEIG

U.S.S.R. COMPUTATIONAL MATHEMATICS AND MATHEMATICAL PHYSICS

Cover-to-cover translation of
Zhurnal vychislitel'noi matematiki i matematicheskoi fiziki
Published bi-monthly by Pergamon Press

HONORARY EDITORIAL ADVISORY BOARD

R. A. BROOKER (*Manchester*)
L. FOX (*Oxford*)
D. C. GILLES (*Glasgow*)
A. S. HOUSEHOLDER (*Oak Ridge*)
G. F. J. TEMPLE (*Oxford*)
A. THOM (*Oxford*)
J. H. WILKINSON (*N.P.L., Teddington*)

Scientific Translation Editor:
R. C. Glass, M.A., M.Sc.,
The City University, St. John Street, London, E.C.1.

Translators: J. Berry and D. E. Brown

Publishing, Subscription and Advertising Office:
Pergamon Press Ltd., Headington Hill Hall, Oxford, OX3 0BW

1975 Subscription rate $180.00
Subscriptions are only serviced after payment has been received and are not accepted for less than one year.
Orders should be sent to the distributors at either of the following addresses:
Headington Hill Hall, Oxford, OX3 0BW
Maxwell House, Fairview Park, Elmsford, N.Y. 10523

Microform Subscriptions & Back Issues
Current subscriptions and back files on microfilm as well as back issues in the regular editions of all previously published volumes are available from our sole distributors, Microforms International Marketing Corporation Inc. (MicroMark) at the most convenient address:
Cowper House, Olney, Bucks, England
380 Saw Mill River Road, Elmsford, New York 10523, U.S.A.

LIST OF CONTENTS

Number 1

	PAGE
V. A. MOROZOV: Convergence of an approximate method of solving operator equations of the first kind	1
V. I. LEBEDEV and S. A. FINOGENOV: Solution of the parameter ordering problem in Chebyshev iterative methods	21
V. T. POLYAK and N. V. TRET'YAKOV: The method of penalty estimates for conditional extremum problems	42
N. V. BANICHUK, V. M. PETROV and F. L. CHERNOUS'KO: An algorithm and problems of the convergence of the method of local variations for problems with partial derivatives	59
V. F. OGARYSHEV: Mixed strategies in a generalization of Gross's problem	73
A. I. ZAVORIN and I. YA. KHESINA: Some numerical methods for the solution of stiff systems of ordinary differential equations	89
I. V. FRYAZINOV: Economical schemes for the multidimensional heat conduction equation with discontinuous coefficients	100
N. N. KUZNETSOV: Application of the smoothing method to some systems of hyperbolic quasilinear equations	115
B. M. BUDAK and V. I. VASIL'EVA: The solution of the inverse Stefan problem	130
A. S. IL'INSKII: A direct method of calculating periodic structures	152
M. V. FEDORYUK: Justification of the method of cross-sections for an acoustic waveguide with inhomogeneous filling	162
YU. N. KULIKOV and B. N. CHETVERUSHKIN: An implicit difference method for temperature determination in problems of radiation gas dynamics	174
O. M. BELOTSERKOVSKII and YU. M. DAVYDOV: Computation of transonic "super-critical" flows by the "coarse particle" method	187
V. M. BRYABRIN and V. M. YUFA: Construction of syntactic analyzers for speech systems	217
Short Communications	
M. A. SHESHKO: Representation of a Cauchy integral over an open contour in terms of multilogarithms	235
G. N. PLESHAKOV: On a multi-dimensional generalization of Simpson's rule	241
M. V. MURAV'EVA: On finding a pulse transfer function by Tikhonov's method of regularization	246
A. M. DENISOV: On the order of approximation when solving a Fredholm equation of the first kind with a kernel of special type	255
A. B. BAKUSHINSKII: The problem of constructing linear regularizing algorithms in Banach spaces	261
N. S. KUKUSHKIN: A game with incomplete information	271
F. I. ERESHKO and A. F. KONONENKO: Solution of a game with a right to the first move and inexact information on the partner's aim	281

PAGE

I. V. ROMANOVSKII and M. G. SOROKINA: One-sided circuit of the tree of versions in the Land and Doig method 288
E. S. BIRGER: On evaluating functionals of the eigenfunctions of a boundary value problem for a system of linear differential equations 297
V. S. GODLEVSKII: An accuracy estimate for the solutions of certain systems of linear algebraic equations 306
A. K. SHATOV: A numerical method for solving the problem of stationary electromagnetic wave diffraction by solids of revolution 312
N. A. TIKHONOV: The determination of a non-linear effect 319
V. A. DORODNITSYN and YU. P. POPOV: The stationary modes of a heavy-current self-constricting radiating discharge in a plasma 328
O. S. SHIROKOVSKAYA: On splitting schemes for the kinetic equation 338
I. E. MIKHAILOV: The shape of the supersonic three-dimensional nozzle possessing maximum thrust 344

Scientific Information
YU. N. VALITSKII: On the convergence of difference approximation in the Dirichlet problem 352
V. I. SMARIKOV and I. G. DYAD'KIN: The Fourth All-Union Seminar on Monte Carlo Methods in Nuclear Geophysics 354
Book Review 355

Number 2

A. G. PRUDKOVSKII: The stationary-phase method applied to parametrically dependent integrals 1
A. V. GONCHARSKII, A. S. LEONOV and A. G. YAGOLA: A generalized discrepancy principle 25
I. A. VATEL' and N. S. KUKUSHKIN: The optimal behaviour of a player with a right to the first move and imperfect knowledge of the second player's interests 38
A. F. KONONENKO: The role of information on the opponent's target function in a two-person game with a fixed sequence of moves 49
D. A. MOLODTSOV: The principle of equalization in a resources distribution problem in a non-competitive situation 57
R. SOLIKH: The problem of calendar planning for a cyclically repeated production process 67
V. B. ANDREEV and S. A. KRYAKVINA: The fundamental solution of a one-parameter family of difference approximations of the Laplace operator in the plane 88
T. S. EFREMOVA and I. V. FRYAZINOV: Economic schemes for a modification of the third boundary value problem 105
A. S. BARASHKOV: The uniqueness of the solution of a converse problem 116
B. P. BELINSKII: The integral equations of stationary problems on the diffraction of short waves at obstacles of the segment type 125

PAGE

O. M. BELOTSERKOVSKII and L. I. SEVERINOV: The conservative "flow" method and the calculation of the flow of a viscous heat-conducting gas past a body of finite size 141

YU. D. SHMYGLEVSKII: Calculation of radiative transfer by Galerkin's method 157

V. M. ZAMALIN and G. E. NORMAN: The Monte-Carlo method in Feynman's formulation of quantum statistics 169

A. A. ESIPOV and V. I. YUDOVICH: Limiting behaviour of eigenvalues of boundary value problems in unbounded expanding domains 184

E. I. MATYEEVA: Solution of the Navier-Stokes equations in complex fields 199

E. A. TRAKHTENGERTS and A. S. SHUMEI: The equivalent transformation of phrase structure grammars to precedence grammars 216

Short Communications

V. S. GODLEVSKII and I. E. EFIMOV: An attribute of matrices of monotonic form and uses of their properties 229

S. M. LOZINSKII: Note on a paper by V. S. Godlevskii 232

A. V. DZHISHKARIANI: Convergence of the Bubnov-Galerkin method for a type of non-linear operator equation 235

V. A. BORISOV: An algorithm for finding all the points minimizing the sum of functions of a special form 244

V. A. EMELICHEV and I. M. KRAVERSKII: A computer experiment on the solution of integer linear programming problems by the construction of a sequence of plans 248

K. A. BAGRINOVSKII and V. V. RADCHENKO: Obtaining a conformed solution in a system of economic planning models 254

YU. P. BOGLAEV: Stable branch points in equations with a small parameter coefficient of the derivative 262

O. N. CHAVCHANIDZE: Solution of a system of non-linear differential equations 269

G. P. ASTRAKHANTSEV: Convergence rate of successive overrelaxation for the solution of the variational-difference equations for elliptic equations in an arbitrary region 273

YU. I. MOKIN and R. D. LAZAROV: Stability of elliptic difference problems 282

A. F. VOEVODIN: The pivotal condensation method for difference equations defined on a complex 292

A. B. KUKANOV and THAY KUANG: The motion of a charged particle in constant and uniform electric and magnetic fields 298

V. YA. GOL'DIN and N. N. KALITKIN: A non-linear method for computing one-dimensional reactor critical parameters 302

S. G. ROZIN, K. A. ROZINA and L. KH. KHOMSKII: A method of simulating an exponential distribution law 307

V. E. YAITSKII: Use of Poisson's stochastic process to calculate the collision relaxation of a non-equilibrium gas 310

T. YA. GRUDNITSKAYA and A. V. SHIPILIN: Calculation of the subsonic flow of a radiating gas by the time dependent method 318

V. N. VOROB'EV: An analytic solution of the problem of the contact of a stamp with an elliptic horizontal section with an elastic half-space 325

PAGE

L. A. OGANESYAN: Note on the paper "A variational-difference method of solving the first boundary value problem for a biharmonic equation on a regular grid" 330
Book Reviews 332

Number 3

V. I. GORDONOVA and V. A. MOROZOV: Numerical parameter selection algorithms in the regularization method 1
B. BUKHBERGER and G. A. EMEL'YANENKO: Methods of inverting tridiagonal matrices 10
T. I. SAVELOVA and V. V. TIKHOMIROV: Solution of convolution-type integral equations of the first kind in the multidimensional case 21
S. M. ERMAKOV: The Neyman-Ulam scheme in the non-linear case 32
G. A. MIKHAILOV: Modification of the local estimate of particle flow by the Monte Carlo method 45
YU. G. EVTUSHENKO and V. G. ZHADAN: Numerical methods of solving some operational research problems 56
K. GASANOV: The existence of optimal controls for processes described by a system of hyperbolic equations 78
N. B. KONYUKHOVA: Segregation of stable manifolds for some non-linear systems of ordinary differential equations with a singularity 91
R. E. GINZBURG: The method of successive approximations for the asymptotic integration of quasilinear autonomous systems 114
F. F. IVANAUSKAS: Study of Green's difference function for a wave system 123
S. G. KREIN and L. N. SHABLITSKAYA: Necessary conditions for stability of difference schemes and the eigenvalues of difference operators 138
N. N. GUDOVICH: On the convergence of the mesh method for nonlinear partial differential equations with monotonic operators 152
S. I. GRINBERG, E. N. SEMENYAKA and I. V. SUKHAREVSKII: Short-wave asymptotic behaviour of Green's function in the problem of diffraction at a plane layer 170
V. M. VASIL'EV, A. I. VOL'PERT and S. I. KHUDYAEV: A method of quasi-stationary concentrations for the equations of chemical kinetics 187
L. S. KLABUKOVA: An approximate method for solving a boundary value problem in the theory of momentless spherical elastic shells 207
V. V. ALEKSANDROV and L. S. RYZHOV: The non-linear acoustics of a radiation gas. II. Weak shock waves 224
A. P. BYRKIN and V. V. SHCHENNIKOV: The calculation of viscous gas flows in plane channels 244
T. M. DADASHEV: On recognition algorithms which are caution-threshold-extremal 255

PAGE

Short communications

V. D. CHUBAN: An economic algorithm for solving systems of algebraic equations by the finite element method 272
R. P. MALEEV: An interative method for equations with monotonic operators 280
E. YA. RIEKSTYN'SH: Asymptotic expansion of a Fourier integral containing a slowly varying function 287
O. N. KARPOV: A method for accelerated discrete filtering of speech signals 296
A. I. KHISAMUTDINOV: A type of "single" class estimator 303
S. A. ORLOVSKII: Infinite two-person games with forbidden situations 311
V. V. MOROZOV: An approach to cooperative games 320
V. K. SAUL'EV: Some mathematical models for stock control in the case of an elementary non-stationary demand 331
A. I. ZUEV: Application of the Newton-Kantorovich method for solving the problem of propagation of non-equilibrium radiation 338
L. A. DORFMAN: Numerical solution of the converse problem for transonic flow in a curved channel 347

Scientific Information

Congress of the International Federation of Information Processing (IFIP) 1974 353
Book Reviews 356

Number 4

M. V. MURAV'EVA: On the optimality and limiting properties of the Bayes solution of a system of linear algebraic equations 1
YA. I. AL'BER: Local convergence theorems for gradient methods in Hilbert space 13
L. T. POZNYAK: Convergence of the Bazley-Fox method in the problem of the eigenvalues of one bilinear form relative to another 25
I. V. VILENKIN: Further notes on plane meshes of integration 43
V. V. VECHESLAVOV and V. I. KOKOULIN: Determination of the parameters of the conformal mapping of simply connected polygonal regions 57
L. G. GURIN: The sufficient conditions for a local minimum 66
Z. SHARIPKHODZHAEVA: On the solution of a boundary value problem in which the highest derivative contains a small parameter and the coefficients have singularities 81
B. M. BUDAK and V. N. VASIL'EVA: On the solution of Stefan's converse problem. II. 97
M. I. BAKIROVA and I. V. FRYAZINOV: An iterative alternating-directions method for the Poisson difference equation in curvilinear orthogonal coordinates 111
V. I. KOSAREV and K. M. MAGOMEDOV: A divergence difference scheme for computing steady supersonic flows of complex structure 131
E. G. D'YAKONOV and I. K. NIKOLAEV: The solution of some problems in the theory of reticulate shells 148

PAGE

N. D. KOPACHEVSKII: Hydrodynamics in weak gravitational fields. Planar problems on the oscillations of an ideal fluid in a vessel 164
L. V. SHURSHALOV: Numerical investigation of the problem of the explosion of a cylindrical charge of finite length 186
V. I. ZHUK and E. M. SHAKHOV: Free expansion of a layer of rarefied gas into a vacuum 199
N. I. DOINIKOV and A. S. SIMAKOV: Application of a modified scalar potential to the numerical solution of three-dimensional magnetostatic problems 216
KH. S. KESTENBOIM and G. S. ROSLYAKOV: Investigation of some problems of the theory of point explosions by an explicit finite-difference method 229
YU. P. GOLOVACHEV, A. M. KUZ'MIN and F. D. POPOV: Calculation of the supersonic flow past blunt bodies using the complete and simplified Navier-Stokes equations 241

Short Communications

V. D. LARICHEV: Asymptotic behaviour of integrals with a large parameter in the argument of a Bessel function 250
I. M. SOBOL: Probability estimate of the integration error for Π_t-nets 259
A. B. PEVNYI: Necessary conditions for a minimaximin 263
V. N. STRAKHOV: The method of successive approximations for linear equations in Hilbert space 269
V. A. MOROZOV: Calculation of the lower bounds of functionals from approximate information 275
I. I. IEVLEV: The approximate solution of equations of the first kind 282
B. V. PAVLOV and A. YU. POVZNER: A method for the numerical integration of systems of ordinary differential equations 292
V. YA. MITNITSKII: Calculation of the supersonic flow of a gas round the atmosphere of a spherical body 298
L. N. TARASENKO: The numerical solution of axially symmetric flows with a free boundary 304
V. I. BARKOV: Radioactive transfer in a plane-parallel multilayer system with non-isotropic scattering 310
V. I. VLASOV and YU. I. KHLOPKOV: A variant of the Monte Carlo method for the solution of linear problems of the dynamics of a rarefied gas 320
A. I. VAINDINER: The interpolation of functions of many variables by generalized polynominals and a lattice collocation method for solving equations of mathematical physics 326
V. I. VYKOV: All-union symposium on the mathematical methods in chemistry 330
Book Reviews

Number 5

V. A. MOROZOV: The error principle in the solution of incompatible equations by Tikhonov regularization 1

PAGE

V. A. VINOKUROV: The order of the error when computing a function whose argument is specified approximately 17
YU. G. MALINOVSKII: Asymptotic behaviour of the eigenfunctions and eigenvalues of integral operators with δ-type kernels 32
A. D. MOROZOV: Approach to a complete qualitative study of Duffing's equation 45
V. T. STOYANTSEV: Solution of the Cauchy problem for a parabolic equation by a quasi-Monte-Carlo method 67
E. N. OREL: The approximation of Bellman's function 76
L. G. GURIN and E. M. STOLYAROVA: A maximum principle in a minimax problem 94
V. D. SKARIN: The method of penalty functions for non-linear programming problems 108
I. V. ROMANOVSKII and N. P. KHRISTOVA: Solution of discrete minimax problems by the method of dichotomy 124
YA. I. RABINOVICH: Cautious synthesis of an efficiency criterion based on expert estimates 136
B. S. DARKHOVSKII and E. S. LEVITIN: The differential properties of the minimax in a problem on the distribution of resources 146
V. K. LEONT'EV: Study of an algorithm for solving the travelling salesman problem 158
A. P. MERENKOV: Comparison of computing methods for hydraulic circuits 170
N. D. KOPACHEVSKII: Oscillations of non-miscible fluids 184
A. S. GORINOV and K. M. MAGOMEDOV: A splitting method for solving relaxation equations with diffusion 202
I. L. BARSKII: Asymptotic estimates for flows of limited width with free boundaries 213
I. I. KUDISH and V. A. RYKOV: Reflection of a shock wave from a rigid wall 232
V. F. BASHURIN, YU. V. VARLAMOV, V. YA. GOL'DIN and V. N. CHETVERUSHKIN: Methods of solving one-dimensional problems of radiation gas dynamics–II. 244
YU. I. KHLOPKOV: Solution of the linearized Boltzmann equation 255

Short Communications

A. V. LOTOV: A numerical method of studying the optimal-time continuity in linear systems and the solution of the Cauchy problem for Bellman's equation 265
A. A. BELOLIPETSKII: The differentiability of isochronous surfaces in the linear time-optimal problem 272
A. I. ERLIKH: An algorithm for calculating the vector satisfying the requirements of programmes 279
V. I. GORDONOVA: The validation of algorithms for choosing the regularization parameter 285
G. P. GOLOVACH and A. F. KALAIDA: Solution of the spectral problem by the splitting method 292
V. V. POSPELOV: The error of Adams' type methods for the Cauchy–Volterra problem 301
E. N. SARMIN: A modification of the method of splitting the boundary conditions for solving the biharmonic equation 306
